Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Company in the preparation of its financial statements. The policies are in conformity with United States (“U.S.”) generally accepted accounting principles, which require management to make estimates and assumptions that affect the reported amounts, contingent assets and liabilities, and disclosures in the financial statements. Actual results could differ from those estimates. Management has considered the circumstances under which the Company should recognize or make disclosures regarding events or transactions occurring subsequent to the balance sheet date through the date the financial statements were issued. Adjustments or additional disclosures, if any, have been included in these financial statements.

CASH

Cash consists of interest bearing and non interest bearing accounts held by the Custodian, a related party.

INVESTMENT VALUATION AND REVENUE RECOGNITION

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

INVESTMENT VALUATION AND REVENUE RECOGNITION (CONTINUED)

The Company invests in other investment companies which consist primarily of mutual funds and exchange traded funds (“ETFs”). Mutual funds are valued at the net asset value or bid prices of the fund, as published or otherwise reported by the respective stock exchange or administrator. The other investment companies in which the Company invests will generally value securities at fair value. Investments in ETFs are stated at the last reported sales price on the day of valuation or at the last quoted bid price, if no sale was reported on the valuation date (see Note 3).

Realized and unrealized gains and losses on investments are calculated using the first-in-first-out method, and are reported in the accompanying statements of operations.

INCOME RECOGNITION

Interest income is earned on cash balances, fixed income securities and money market securities. Interest income earned on cash balances is recognized when posted. Interest income on fixed income securities is recognized on an accrual basis based on the stated interest rate of the security. Dividend income is recognized on the ex-dividend date and is presented net of withholding taxes, which are withheld by the Custodian’s clearing brokers.

Purchases and sales of investment securities and income and expense items denominated in currencies other than Segregated Account’s functional currency are translated to the Segregated Account’s function currency on the respective date of such transactions.

The Company does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized gain or loss on sale of investments, and the net change in unrealized appreciation or depreciation on investments.

CONDENSED SCHEDULES OF INVESTMENTS

The accompanying condensed schedules of investments present the investments by country. The industry classifications included in the condensed schedules of investments represent management's belief as to the most meaningful presentation of the classification of the Company's investments.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

For the year ended December 31, 2018, there were no recent accounting pronouncements that would impact the financial statements of the Fund.

NOTE 3 - FAIR VALUE MEASUREMENTS

The Company follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Company's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Company's investments and are summarized in the following fair value hierarchy:

- Level 1 – inputs are based upon unadjusted quoted prices for identical instruments traded in active markets. Level 1 non-derivative investments primarily include U.S. treasuries, domestic and international equities, and actively traded mutual funds. Level 1 derivative assets and liabilities include those actively traded on exchanges.
- Level 2 – inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant inputs are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Where applicable, these models project future cash flows and discount the future amounts to a present value using market-based observable inputs including interest rate curves, foreign exchange rates, and forward and spot prices for currencies and commodities. Level 2 non-derivative investments consist primarily of corporate notes and bonds, non-U.S. government debt, mortgage-backed securities, agency securities, certificates of deposit, and commercial paper. Level 2 derivative assets and liabilities primarily include certain over-the-counter option contracts.
- Level 3 – inputs are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability. The fair values are therefore determined using model-based techniques, including option pricing models and discounted cash flow models.

LOM FUNDS SAC LTD.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2018

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

Securities for which market quotations are not readily available are fair valued as determined by the Investment Manager. Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

The use of valuation techniques and the availability of observable inputs can vary from security to security and is affected by a wide variety of factors and other characteristics particular to the transaction. Factors that may be considered when fair valuing a security are: fundamental analytical data relating to the investment in the security; evaluation of the forces that influence the market in which the security is purchased and sold; type of security or asset; financial statements of issuer; special reports prepared by analysts or the Investment Manager; information as to any transactions or offers with respect to the security; and the historical tendency of the security's price to track or respond to general and specific market movements (in terms of indices, sectors, or other market measurements). To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for securities categorized in Level 3.

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2018

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

VALUATION TECHNIQUES

EQUITY SECURITIES (COMMON STOCKS, MUTUAL FUNDS, PREFERRED STOCKS AND EXCHANGE TRADED FUNDS (“ETFs”))

Equity securities traded on a national securities exchange (or reported on a national market) are stated at the last reported sales price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Open-end mutual funds are valued at the last published price reported on the major market on which the mutual funds are listed and are classified as Level 1.

GOVERNMENT BONDS (U.S. AND FOREIGN)

The fair value of government bonds is generally based on quoted prices in active markets. When quoted prices are not available, fair value is determined based on a valuation model that uses inputs that include interest rate yield curves, cross-currency basis index spreads, and country credit spreads similar to the bond in terms of issuer, maturity and seniority. Government bonds are generally categorized in Levels 1 or 2 of the fair value hierarchy depending on the inputs used and market activity levels for specific securities, based upon independent pricing from known independent pricing services.

MUNICIPAL BONDS

The fair value of municipal bonds is estimated using recently executed transactions, market price quotations and pricing models that factor in, where applicable, interest rates, bond or credit default swap spreads and volatility. Municipal bonds are generally categorized in Level 2 of the fair value hierarchy.

CORPORATE BONDS (U.S. AND FOREIGN)

The fair value of corporate bonds is estimated using recently executed transactions, market price quotations (where available), bond spreads or credit default swap spreads. The spread data used is for the same maturity as the bond. If the spread data does not reference the issuer, then a comparable issuer is used. When observable price quotations are not available, fair value is determined based on cash flow models with yield curves, bond or single name credit default swap spreads and recovery rates based on collateral values as key inputs. To the extent that these inputs are observable the values of corporate bonds are generally categorized as Level 2.

GOVERNMENT AGENCY SECURITIES (U.S. AND FOREIGN)

Government agency securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued principally using dealer quotations. To the extent that these inputs are observable, the values of government agency securities are categorized at Level 2.

LOM FUNDS SAC LTD.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2018

NOTE 3 - FAIR VALUE MEASUREMENTS (CONTINUED)

MORTGAGE-BACKED SECURITIES

Mortgage-backed securities are typically fair valued using pricing models based on a security's average life volatility. The models take into account tranche characteristics such as average life of the underlying mortgages, including assumptions regarding pre-payments and default rates, loan to value ratios, ratings, the issuer and tranche type, geographic characteristics, and discount margin for certain floating rate issues. Certain securities are valued principally using dealer quotations.

To the extent that these inputs are observable, the values of mortgage-backed securities are categorized at Level 2.

ASSET-BACKED SECURITIES ("ABS")

Asset-backed securities are interests in pools of loans or other receivables. ABS are created from many types of assets, including auto loans, home equity loans and other receivables. ABS are typically fair valued using estimated expected future cash flows of each security by estimating the expected future cash flows of the underlying collateral and applying those collateral cash flows, together with any credit enhancements such as subordinating interests owned by third parties, to the security. The expected future cash flows of the underlying collateral are determined using the remaining contractual cash flows adjusted for future expected credit losses (including current delinquencies and nonperforming assets, future expected default rates and collateral value by vintage and geographic region) and prepayments.

The expected cash flows of the security are then discounted at the interest rate used to recognize interest income on the security to arrive at a present value amount. Certain securities are valued principally using dealer quotations. To the extent that these inputs are observable, the values of asset-backed securities are categorized at Level 2.

NOTE 4 - CAPITAL STOCK

INCENTIVE FEES

The Investment Manager is entitled to an incentive fee equal to 20% of the increase in the value of the net asset value above the prior quarter's net asset value for the LOM Emerging Market Fund, if the Fund shows positive performance and exceeds the 'high water mark' level. NOTE 6 - ADMINISTRATION FEES

In accordance with the terms of the contract with Beacon Fund Services (Bermuda) Ltd. (the "Administrator"), the Company is charged administrative fees equal to 0.09% of the combined net asset value of the segregated accounts created under the Company, allocated to each Fund pro-rata based on the net asset value of each Fund in relation to the combined net asset value. During 2018, administration fees amounted to \$159,472.

NOTE 7 - TAXATION

Under current Bermuda law, the Company is not required to pay taxes in Bermuda on either income or capital gains. The Company has received an undertaking from the Bermuda government that, in the event of income or capital gains taxes being imposed, the Company will be exempted from such taxes until March 31, 2035.

It is the Directors' belief that the Company is not engaged in United States trade or business and is not subject to United States income or withholding taxes in respect of the profits and losses of the Company other than the 30% withholding tax on US source equity dividends. Foreign securities held by the Company may be subject to foreign taxation on gains, dividends and interest income received. Foreign taxes, if any, are withheld by the Company's clearing brokers based on the tax laws in the applicable foreign jurisdiction.

In addition, the Directors believe that the Company is not subject to income taxes in any other jurisdiction and that there are no uncertain tax positions that would require recognition in the financial statements. NOTE 8 - DERIVATIVE FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company does not buy or hold derivative financial instruments outside of listed options on equity securities, Treasury futures and options on Treasury futures. Some of the other investment companies in which the Company invests are dealing or trading in these instruments as their principal investment activity or use these instruments as part of their investment strategy. This may result in market or credit risk to the other investment companies in excess of the amount invested in these instruments. However, the Company's risk is limited to the net asset values of its investments in the other investment companies.

NOTE 9 - FAIR VALUE OF FINANCIAL INSTRUMENTS

In addition to the fair values of investments as disclosed in the condensed schedules of investments, the fair values of the Company's other financial instruments, including cash and cash equivalents, accounts payable and accrued expenses approximate their carrying values due to the short term maturity of these financial instruments.

NOTE 10 - GUARANTEES

In the normal course of its operations, the Company enters into contracts or agreements that contain indemnifications and warranties. The Company's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Company that have not yet occurred. However, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2018

NOTE 12 - FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS

CREDIT AND LIQUIDITY RISK

The Company is potentially subject to both credit and liquidity risk, principally through its investments in securities. The Company's credit risk is equal to the replacement cost at the then estimated fair value of the instrument. Credit risk arises because the possibility that promised cash flows on securities held will not be paid in full. Credit risk is risk due to uncertainty in a counterparty's (also called an obligor's or creditor's) ability to meet its obligations.

MARKET RISK

Market risk arises primarily from uncertainty around the future prices of financial instruments held by the Company and represents the loss the Company might incur through holding such instruments in the face of price movements. The Investment Manager allocates the Company's portfolio of investments with a view to minimizing the risk associated with particular countries and industry sectors.

CURRENCY RISK

The investments of each Fund are denominated in the related base-currency thus minimizing currency risk. The investments of each Fund are exposed to changes in foreign exchange rates (currency risk) where gains or losses may exceed the related amounts recorded. The fair value may change based on the fluctuations in the exchange rate of these underlying currencies.

NOTE 13 - SUBSEQUENT EVENTS

Subsequent events through until June 10, 2019 have been evaluated by the Investment Manager.
