## Directors' report

The Directors have the pleasure to present the audited financial statements of Jacana Diversified Fund Ltd. (the "Company") for the year ended 31 December 2015 and report as set out herein in respect of matters required by the Bermuda Stock Exchange listing regulations.

At 31 December 2015 the Net Asset Value per Participating Share was US\$167.73 (2014: US\$166.22).

No dividends have been declared in the year ended 31 December 2015 (2014: US\$Nil) and the Directors do not recommend the payment of any dividends for the year ended 31 December 2015 (2014: US\$Nil).

## Connected parties

Transactions carried out with the Company by the Administrator, Investment Adviser, Custodian and Directors ("connected parties") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the Shareholders.

The Directors are satisfied all transactions with connected parties entered into during the year were conducted at arm's length prices.

## Market Review

2015 turned out to be quite a volatile year in global financial markets. For many, it will be hallmarked as the year when the Federal Reserve in the US finally raised interest rates, the first time since before the financial crisis of 2008. Having said this, interest rates in the US remain extremely low, and other key regions such as the EU and Japan have retained quantitative easing policies. In addition, numerous countries continued to cut interest rates over the year, giving rise to the main macro theme for 2015.

The US federal reserve finished its quantitative policy in late 2014, so for most of 2015 global markets deliberated about when rates would be hiked, which eventually came in December with a small 25bp increase, hardly the 'lift-off' the financial press was gearing it up to be. Moreover, longer term US interest rates were relatively unchanged, resulting in another quiet year for interest-rate focussed macro funds.

Currency markets, however, were much more fruitful. One of the major macro trends for the year was the strength of the US dollar, which appreciated against the euro and saw even stronger gains against a number of emerging market currencies. Linked to quite severe weakness for a number of emerging markets was the large decline in the price of oil, the dramatic fall of which over the second half of the year made it the most important global story.

The global oil market experienced the 'double whammy' of stagnating global demand and increased supply throughout the year. The former was most likely effected from a relative slowdown in China, as it continues to try and evolve from an export-led growth economy to one focused on internal consumption. On the latter, increased supply from the US shale industry and competing OPEC members failing to agree on a cut in production led to extreme pessimism for the commodity which saw it end over 40% down from the start of the year. The follow-on effects were significant, with countries such as Russia seeing its currency tumble against the US dollar. Volatility in the price of oil continues to be a major market theme into 2016.

Global equities also had a volatile year, with the S&P 500 in the US finishing slightly down and the MSCI Emerging markets index falling 8%. The only bright spot was the European markets, where stocks seemed to be helped more by ongoing stimulus programs rather than any sign of a robust recovery, especially in the periphery. Germany saw one of the strongest equity markets, while those exposed to slow-downs in China and commodity producers saw sharp losses over the year. Global stocks, as measured by the MSCI World Index, finished down 2.7% for the year.

Global hedge fund performance was greatly varied over 2015, both between strategies as well as high internal strategy dispersion. Funds focussing on shorter-term relative value strategies, including those at multi-strategy and systematic funds, tended to have a solid to strong year. Those with more directional strategies, such as macro, saw more volatility, with a significant percentage of funds finishing in negative territory for the year.

**Directors' report (continued)**

**Market Review (continued)**

The Company saw positive contributions coming from its main strategy allocations over the year. Unlike previous years, macro performance was promising, especially during the first quarter where gains were particularly seen from global FX trading. Performance for the strategy tapered over the second half of the year as a number of geopolitical and market-based shocks affected portfolios, including the surprise Chinese currency devaluation in August. The primary driver of performance was again the multi strategy allocation, with strong contributions coming from the core positions and there was only one notable detractor, which was reduced in size at the end of the year after a number of its strategies struggled during the year amid heavy growth in assets. The Company's allocation to systematic funds continued to increase over the year and again was a very consistent performer.

**Outlook**

Going into 2016 with heightened volatility, diverging policies and mixed economic growth, the opportunity set remains robust for a number of hedge fund styles and strategies. We firmly believe that our continued ability to identify managers who will provide low correlation to traditional asset classes will result in consistent above average returns for our Shareholders.

**Thanks**

We thank the Shareholders for their support and look forward to further opportunities for continued growth.

For and on behalf of Jacana Diversified Fund Ltd.

**Independent Auditors' Report to the Shareholders of Jacana Diversified Fund Ltd.**

*Report on the Financial Statements*

We have audited the accompanying financial statements of Jacana Diversified Fund Ltd. (the "Company"), which comprise the Statement of Comprehensive Income for the year ended 31 December 2015, the Statement of Financial Position as at 31 December 2015, the Statement of Cash Flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

This report is made solely to the Company's Shareholders, as a body, in accordance with the terms of our engagement. Our audit work has been undertaken so that we might state to the Company's Shareholders, those matters we are required to state to them in an Auditors' Report and for no other purpose. We do not accept or assume responsibility to anyone other than the Company's Shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

*Directors' Responsibility for the Financial Statements*

The Directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as they determine necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

*Auditors' Responsibility*

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2015, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

*The accompanying notes form part of these financial statements.*

## 1. General

Jacana Diversified Fund Ltd. (the "Company") was incorporated in the British Virgin Islands on 18 June 2001 and was re-domiciled to Bermuda on 1 December 2003 under the Bermuda Companies Act 1981 as amended and acts as an investment company. The Company is listed on the Bermudan Stock exchange.

The Company's objective is to achieve long-term capital growth by investing either directly or indirectly, through selected funds or investment managers, in a strategically determined mix of global fixed income securities, equity securities, derivative securities, currencies and other investment assets with an emphasis on long-term growth.

The Company may from time to time hold investments in collective investment schemes ("Investee Funds") that are advised and managed by the Investment Adviser (where such funds exist,) and Investee Funds advised and managed by Aurum Fund Management Ltd., these Investee Funds are referred to hereafter as "other Aurum Jacana Funds" or "other Aurum Funds" respectively.

The audited financial statements were approved by the Board of Directors on 8 March 2016.

## 2. Significant Accounting Policies

The significant accounting policies which have been applied are set out below.

### Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The accounting policies have been applied consistently by the Company and are consistent with those used in the previous year, other than for the effect of any new standards adopted.

### Adoption of new accounting standards and amendments, including accounting policy changes

International Accounting Standard ("IAS") 24, "Related Party Disclosures" amendments adds an entity to the definition of key management personnel when that entity or any member of a group of which it is a party provides key management personnel services to the reporting entity or to the parent of the reporting entity and is effective for annual periods on or after 1 July 2014. Amounts incurred by the Company for the provision of key management personnel services by a separate management entity shall be disclosed. The amendment did not have any impact on the Company's financial position or performance.

### New standards and interpretations applicable to future reporting periods

The Directors have considered all the upcoming IASB standards. There are standards and interpretations issued but not effective that have not been adopted in these financial statements:

- IFRS 9 "Financial Instruments", published in July 2014, will replace the existing guidance in IAS 39. It includes revised guidance on the classification and measurement of financial instruments, including a new expected credit loss model for calculating impairment of financial assets, and the new general hedge accounting requirements. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39. IFRS 9 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted.

Based on initial assessment, this standard is not expected to have a material impact on the Company.

### Basis of preparation

The financial statements have been prepared on a historical cost basis except for financial instruments classified at fair value through profit or loss that have been measured at fair value.

The financial statements have been prepared on a going concern basis.

The functional currency of the Company is the US dollar as the Directors have determined that this reflects the Company's primary economic environment. The presentation currency of the financial statements is also the US dollar.

### Assets and liabilities

#### Investments

The Company classifies its financial investments (assets and liabilities) into categories in accordance with IAS 39 "Financial Instruments: Recognition and Measurement".

## 2. Significant Accounting Policies (continued)

### Assets and liabilities (continued)

#### *Financial assets designated at fair value through profit or loss*

The Company, on initial recognition, designates investments at fair value through profit or loss as, in doing so, it results in more relevant information because the investments and related liabilities are managed as a group of financial assets and liabilities and performance is evaluated on a fair value basis and reported to key management personnel accordingly. The term financial assets designated at fair value through profit or loss include investments in Investee Funds. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the date of measurement.

Investments are recorded on the trade date at which point the Company becomes a party to the specific investment. Initial measurement of fair value is based on the transaction price at the trade with any transaction costs being expensed immediately. After initial measurement any changes in fair value, and realised gains or losses, related to investments are recognised in the Statement of Comprehensive Income within net gain on investments.

#### *Financial assets at amortised cost*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and they are carried at amortised cost. The Company includes in this category cash and cash equivalents, amounts receivable from brokers, if any, and other receivables. The amortised cost of a financial asset is the amount at which the instrument is measured at initial recognition (its fair value) adjusted for initial direct costs, minus principal repayments, plus or minus the cumulative amortisation, using the effective interest rate method, of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

#### *Financial liabilities at amortised cost*

The Company includes in this category expenses payable for investments purchased.

#### *Offsetting*

Financial assets and liabilities are offset and the net amount presented in the Statement of Financial Position when, and only when, the Company has a legal right to set off the recognised amounts and it intends to either settle on a net basis or to realise the asset and settle the liability simultaneously.

For the year ended 31 December 2015, and 31 December 2014, there were no financial assets or liabilities subject to enforceable master netting arrangements or similar agreements which would require disclosure.

#### *Derecognition*

A financial asset is derecognised when the Company loses control over the contractual rights that comprise that asset. This occurs when the rights are realised, they expire or they are surrendered. A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or it expires.

#### *Participating Shares*

Under IFRS, Participating Shares redeemable at the Shareholder's option are classified as financial liabilities and the format of the Statement of Financial Position reflects this in accordance with IAS 32 "Financial Instruments: Presentation". The net assets attributable to holders of Participating Shares are stated at the redemption amount on the reporting date without discounting.

#### *Sponsor Shares*

Sponsor Shares are classified as equity based on the substance of the contractual arrangements between the Company and the Sponsor Shareholder and in accordance with the definition of equity instruments under IAS 32. The Sponsor Shareholder's equity is stated at amortised cost.

#### *Translation of foreign currencies*

Transactions in currencies other than US dollar are recorded at the rate prevailing on the date of the transaction. At each reporting date, non US dollar denominated monetary items and assets and liabilities measured at fair value are retranslated at the rate prevailing on the reporting date. Foreign currency exchange differences related to investments at fair value through profit or loss are included in net gain on investments. All other differences are reflected in net profit or loss for the year.

#### *Net gain on investments*

Net gain on investments includes all realised and unrealised fair value changes and foreign exchange differences, but excludes interest.

Net realised gain on investments is calculated using the average cost method.

## 2. Significant Accounting Policies (continued)

### Interest Income

Interest income is recognised in the Statement of Comprehensive Income for all interest bearing instruments on an effective interest rate yield basis.

### Cash and Cash Equivalents and Bank Overdrafts

Cash and cash equivalents comprise cash balances held at banks. Bank overdrafts are repayable on demand. In the Statement of Cash Flows, cash and cash equivalents are shown net of any short term overdrafts which are repayable on demand, and form an integral part of the Company's cash management.

### Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

### Significant accounting judgements and estimates

The preparation of financial statements in accordance with IFRS requires management to make estimates, judgements and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of income and expenses during the year. Actual results could differ from those estimates.

Revisions to accounting estimates are recognised in the year in which an estimate is revised. The areas of estimates which have the most significant effect on the amounts recognised in the financial statements are disclosed within note 10 'Financial Instruments and Risk Exposure' and note 11 'Fair Value Measurement'.

### Structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes; restricted activities, a narrow and well-defined objective, such as to provide investment opportunities for investors by passing on risks and rewards associated with the assets of the structured entity to investors, insufficient equity to permit the structured entity to finance its activities without subordinated financial support and financing in the form of multiple contractually linked instruments to investors that create concentrations of credit or other risks.

The Company invests in Investee Funds whose objectives range from achieving medium to long term capital growth. The Investee Funds are managed by related and unrelated asset managers and apply various investment strategies to accomplish their respective investment management objectives. The Investee Funds finance their operations by issuing redeemable shares and interests which are puttable at the holder's option and entitle the holder to a proportional stake in the respective Investee Fund's net assets. The Company holds redeemable shares and interests in each of its Investee Funds. The Company considers that the Investee Funds display some of the features and attributes of a structured entity to varying degrees, therefore, the Directors have presented disclosures related to structured entities for all Investee Funds, where obtainable, as they consider these disclosures may be of relevance to the Company's investors.

## 3. Investment Adviser and Incentive Fee

The Company pays the Investment Adviser (i) a monthly Advisory fee of 0.16666% (equivalent to approximately 2% per annum) of the Net Asset Value of the Participating Shares of the Company as at the relevant month end; and (ii) a monthly incentive fee of 15% of the increase, if any, of the Net Asset Value of the Participating Shares of the Company as at the end of each month, over the Base Value of the Participating Shares of the Company, increased by a factor of 0.83333% (equivalent to approximately 10% per annum) for each month that has expired since the Base Date, or if higher the Net Asset Value of the Participating Shares of the Company on the last date in respect of which an incentive fee was paid (the high water mark in respect of the Company). The Base Date is the 31 December immediately prior to the month and the Base Value is the Net Asset Value of the Participating Shares of the Company as at that date. For the purposes of this calculation it is assumed that all the Participating Shares in issue at the valuation day were in issue at the Base Date or the high water mark date as the case may be and had a Net Asset Value equal to the Net Asset Value of each Participating Share in the Company at the Base Date or the high water mark date as the case may be. These fees are calculated before all Investment Adviser, Administrators and Custodian fees, Directors' fees, audit fees, formation and sundry expenses for the month concerned have been deducted and are paid monthly in arrears. In so far as the Company invested in other Aurum Jacana Funds or other Aurum Funds no fees are payable on the amount so invested in addition to those already charged by such other Funds.

#### 4. Bermuda Administrator, Registrar, Secretary and Administrator Fees

The Company pays to the Secretary, Bermuda Administrator and Registrar and the Administrator and Sub-Registrar (collectively the "Administrators") an annual fee of US\$1,500 plus a monthly fee which, subject to a minimum, will be no greater than 1/12 of 0.085% of the Net Asset Value of the Company. These fees are calculated before all fees payable to the Investment Adviser, Administrators, Custodian and Directors' fees, audit fees, formation and sundry expenses for the month concerned are deducted, are paid monthly in arrears, are subject to a US\$2,000 minimum per month and may be subject to reduction if the total Administration Fees from other Aurum Jacana Funds or other Aurum Funds exceed specified limits. In so far as the Company invests in other Aurum Jacana Funds or other Aurum Funds, no fees will be payable by the Company on the amount so invested, in addition to those already charged by such other Aurum Jacana Funds or other Aurum Funds, but the annual fee and monthly minimum will remain applicable.

#### 5. Custodian Fee

The Company pays to the Custodian a monthly fee no greater than 1/12 of 0.04% of the Net Asset Value of that part of the assets of the Company entrusted to the care of the Custodian. This fee is calculated before all fees payable to the Investment Adviser, Administrators, Custodian and Directors, audit fees, formation and sundry expenses for the month concerned are deducted, is paid monthly in arrears, is subject to a US\$1,000 minimum per month and may be subject to reduction if the total Custodian Fees from other Aurum Jacana Funds or other Aurum Funds exceed specified limits. In addition, the Custodian shall receive from the Company a transaction fee of US\$150 for each transaction conducted pursuant to the Custodian Agreement. In so far as the Company invests in other Aurum Jacana Funds or other Aurum Funds, no fees will be payable by the Company on the amount so invested, in addition to those already charged by such other Aurum Jacana Funds or other Aurum Funds, but the minimum, and transaction fees, will remain applicable.

#### 6. Share Capital

	December 2015 US\$	December 2014 US\$
<b>Authorised share capital of US\$0.01 par value per share</b>		
1,000 Sponsor Shares (presented as equity in accordance with IAS 32)	10	10
4,999,000 Participating Shares (presented as a liability in accordance with IAS 32)	49,990	49,990
<b>Authorised share capital</b>	<b>50,000</b>	<b>50,000</b>

All of the Sponsor Shares have been issued to and are beneficially owned by the Investment Adviser.

The Sponsor Shares do not carry the right to participate in the assets of the Company in a winding up, except to the extent of repayment of par value paid in cash, nor in any dividends or other distribution of the Company so long as any Participating Shares are in issue.

The Participating Shares are entitled to receive, to the exclusion of the Sponsor Shares, any dividends which may be declared by the Board of the Company and, upon the winding up of the Company, their par value and any surplus remaining after paying to the holders of the Sponsor Shares the par value of the Sponsor Shares (to the extent actually paid up in cash). The Sponsor Shares have the general voting powers of the Company and the holders of Participating Shares are entitled to receive notice of and attend all general meetings of the members.

	Number of Participating Shares		Number of Participating Shares
Opening at 1 January 2015	53,676.62	Opening at 1 January 2014	72,597.10
Redeemed during the year	(1,448.49)	Redeemed during the year	(18,920.48)
<b>Closing at 31 December 2015</b>	<b>52,228.13</b>	<b>Closing at 31 December 2014</b>	<b>53,676.62</b>

## 6. Share Capital (continued)

### Statement of Changes in Sponsor and Participating Shares

	Sponsor Shares US\$	Participating Shares US\$	Share Premium and Return allocated to Participating Shareholders US\$	Total US\$
<b>Balance at 1 January 2015</b>	10	537	8,921,830	8,922,377
Change in net assets attributable to holders of Participating Shares resulting from operations			81,901	81,901
Redemptions during the year		(14)	(244,025)	(244,039)
<b>Balance at 31 December 2015</b>	10	523	8,759,706	8,760,239
<b>Balance at 1 January 2014</b>	10	726	10,481,970	10,482,706
Change in net assets attributable to holders of Participating Shares resulting from operations			1,561,191	1,561,191
Redemptions during the year		(189)	(3,121,331)	(3,121,520)
<b>Balance at 31 December 2014</b>	10	537	8,921,830	8,922,377

## 7. Bank Overdraft

The Company has a facility with Northern Trust Company, London Branch and any outstanding bank overdraft is secured over the portfolio of the Company.

## 8. Net Asset Value per Participating Share

The Net Asset Value per Participating Share is calculated by dividing the net assets attributable to holders of Participating Shares included in the Statement of Financial Position by the number of Participating Shares in issue at the year end.

	December 2015 US\$	December 2014 US\$
<b>Net Asset Value per Participating Share</b>		
Net assets attributable to holders of Participating Shares (US\$)	8,760,229	8,922,367
Issued Participating Shares (number of shares)	52,228.13	53,676.62
<b>Net Asset Value per Participating Share (US\$)</b>	167.73	166.22

## 9. Related Parties

In accordance with IAS 24 "Related Party Disclosures" the related parties to the Company are outlined below.

The Company's related parties include the Directors, the Administrator, the Investment Adviser and the Custodian.

### Directors

Mr D R Cottingham, Mr C C Morris, Mr A Hopkin and Mr A De Fay are Directors of the Investment Adviser. Mr A Hopkin and Mr C C Morris are Directors of Continental Sponsors Ltd, the sponsoring broker on the Bermuda Stock Exchange. Mr D R Cottingham and Mr C C Morris are also Directors of Global Fund Services Ltd, the Bermuda Administrator, and are Directors of Aurum Fund Management Ltd. Mr A Sweiden is a Vice President of Investments with Aurum Fund Management Ltd. Messrs D R Cottingham, Mr C C Morris and A Sweiden directly and indirectly own shares in Aurum Fund Management Ltd. Mr A Hopkin is a Director of Aurum Fund Management Ltd.

The Directors have not directly held Participating Shares in the Company during the year (2014: Nil).

The Directors of the Company and Investment Adviser may act as Directors of other Investment companies.

## 9. Related Parties (continued)

During the year, the Company had dealings with other Aurum Funds, the dealings were conducted in order to balance the portfolio of investments, and those dealings may be identified as follows:

	2015 US\$	2014 US\$
Sales of investments to such other funds	650,000	1,501,180
Purchases of investments from such other funds	1,000,000	-

At the end of the year, there were no amounts due to or from such other funds (31 December 2014: US\$Nil).

## 10. Financial Instruments and Risk Exposure

The Company, in the normal course of business, enters into investment transactions in financial instruments through investments in Investee Funds. Financial instruments include investments, cash, interest receivable, dividends receivable, subscriptions receivable, bank overdrafts, accrued expenses, redemptions payable and Participating Shares presented as financial liabilities. The carrying value of these financial instruments in the financial statements approximates their fair value.

Investments in Investee Funds are recorded at the net asset value per share as reported by the administrators of the Investee Funds at the measurement date which the Directors believe to best represent fair value. Where administrators are unable to provide net asset value per share the Directors make their own assessment of fair value based on available information. In determining fair value the Directors take into consideration, where applicable, the impact of suspension of redemptions, liquidation proceedings, investments in side pockets and any other significant factors.

At 31 December 2015, and 31 December 2014, there were no instances wherein the administrator was unable to provide the net asset value per share or that the Directors considered it necessary to make any adjustment to the net asset value per share provided in order to arrive at fair value.

Asset allocation is determined by the Board of Directors who manage the distribution of the assets to achieve the investment objectives set out in note 1 'General'. Divergence from target asset allocations and the composition of the portfolio is monitored by the Board of Directors.

The Company is limited by the Prospectus as to the percentage of assets that may be invested into any one investment in order to diversify risk. The holding of such instruments results in exposure to market risk, credit risk and liquidity risk.

### Market Risk

Market risk is the risk that the market price of the financial instrument will fluctuate due to changes in foreign exchange rates, market interest rates, market factors specific to the security or its issuer or factors affecting all securities traded in the market. All investments are recognised at fair value, and all changes in market conditions directly affect net income.

The Company's market risk is managed by the Company within a rigorous risk management framework including diversification of the investment portfolio. The risk management policy includes initial and subsequent due diligence reviews of all underlying investments of entities included within the portfolio.

The Company does not use sensitivity analysis to measure market risk.

**Market risk – interest risk;** the Investee Funds do not pay interest, and as a result are subject to limited risk due to fluctuations in the prevailing levels of market interest rates on these investments.

**Market risk – currency risk;** the risk that the value of a financial instrument may fluctuate due to changes in the price of one currency against another.

The Company invests in Investee Funds which are denominated in US dollar.

**10. Financial Instruments and Risk Exposure (continued)****Market risk – currency risk (continued)**

The Investee Funds in which the Company invests have full discretion as to the currencies in whose shares their investments are denominated. Consequently, performance of the Investee Funds may be subject to fluctuations in foreign currency exchange rates.

**Market risk – other price risk**

Other price risk is the risk that the value of an investment may fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment or all factors affecting all instruments traded in the market. As the majority of the Company's investments are carried at fair value with fair value changes recognised through the Statement of Comprehensive Income, all changes in market conditions may directly affect net income.

Other price risk is mitigated by the Board of Directors constructing a diversified portfolio of investments traded on various markets. However, if the price of the Investee Funds in the portfolio rose by 1%, the net asset value of the portfolio before deduction of borrowings would also rise by approximately 1% and vice versa. Level 3 investments held at 31 December 2014 relate to investments in Investee Funds that were subject to side pockets or gates.

The right of the Company to request redemption of its investments in Investee Funds ranges in frequency from daily to quarterly. The Company invests across a broad range of fund managers, which have been classified under the following investment strategies:

*Multi-Strategy* funds utilise a variety of investment strategies with the goal of generating a smooth return that is not reliant on one type of market condition to generate returns. In general the Aurum Funds invest in managers that are biased to our favoured strategies of systematic, macro, fixed income and equity trading but these managers may also hold some allocation to credit and arbitrage strategies.

*Macro* is one of the most classical hedge fund strategies. Portfolio Managers have a wide range of tools at their disposal including stocks, bonds, and derivatives, and seek to profit from movements in global interest rates, equity markets, commodity prices, and foreign exchange values. Positions tend to be thematic in nature, backed by rigorous economic research and political insight.

*Equity strategies* involve the buying and selling of listed equities based on a wide range of varying opinions, research, and forecasting techniques. The most common type is based on fundamental research based on company analysis (earnings growth etc), although the presence of automatic and quantitatively based trading styles has proliferated in recent years.

*Systematic* encompasses a range of strategies that are all researched, developed and traded using quantitative methods. This will likely involve the use of computer algorithms, automated execution systems and vast types and amounts of data.

The table below reflects the exposure of the Company to the above listed strategies:

<b>31 December 2015</b>					
Strategy	Number of funds	Range of Net Asset Value of Investee Fund (US\$m)	Weighted average of Net Asset Value of Investee Fund (US\$m)	Fair value US\$	% of Net Assets
Multi-Strategy	7	207 - 17,610	7,126	4,866,072	55.55%
Macro	5	703 - 6,700	3,741	2,349,483	26.82%
Systematic (Quantitative)	3	344 - 1,621	850	1,660,158	18.95%
Total	15			8,875,713	101.32%
Net other assets and liabilities				(115,474)	(1.32%)
Total Net Assets				8,760,239	100.00%

**10. Financial Instruments and Risk Exposure (continued)**

Market risk – other price risk (continued)

<b>31 December 2014</b>						
Strategy	Number of funds	Range of Net Asset Value of Investee Fund (US\$m)	Weighted average of Net Asset Value of Investee Fund (US\$m)	Fair value US\$	% of Net Assets	
Multi-Strategy	5	662 - 7,721	3,493	4,103,389	45.99%	
Macro	4	2,495 - 5,705	4,007	2,551,425	28.60%	
Equity Strategies	2	239 - 612	453	1,214,432	13.61%	
Systematic	1	594	594	621,392	6.96%	
<b>Total</b>	<b>12</b>			<b>8,490,638</b>	<b>95.16%</b>	
Net other assets and liabilities				431,739	4.84%	
<b>Total Net Assets</b>				<b>8,922,377</b>	<b>100.00%</b>	

The sum total of fair values shown in the above table are reflected in the Statement of Financial Position on page 7 as Investments at fair value.

The Company's maximum exposure to loss from its interests in Investee Funds is equal to the total fair value of its investments in Investee Funds. Once the Company has disposed of its shares in an Investee Fund the Company ceases to be exposed to any risk from that Investee Fund. The Company's investment strategy entails trading in Investee Funds on a regular basis. Total purchases in Investee Funds during the year ended 31 December 2015 were US\$2,533,505 (2014: US\$2,235,712). Total sales of Investee Funds during the year ended 31 December 2015 were US\$2,233,102 (2014: US\$6,341,935). As at 31 December 2015, and 31 December 2014, there were no capital commitment obligations and no amounts due to Investee Funds for unsettled purchases.

During the year ended 31 December 2015 total net gain on investments in Investee Funds was US\$334,672 (2014: US\$1,853,036).

**Credit Risk and other price risk**

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Certain markets which may be traded by the Company or any Investee Fund in which the Company invests, for example the inter-bank market in currencies, the swaps market and the government securities market are "principal's markets" in which they are fully subject to the risk of counterparty default.

Credit risk is managed by the Company through initial and subsequent due diligence reviews of all underlying investments, as already stated. The diversification of the investment portfolio reduces the overall credit risk to the Company.

The carrying amounts of financial assets best represent the maximum credit risk exposure at the Statement of Financial Position date. This relates also to financial assets carried at amortised cost, as they have a short-term to maturity.

The carrying amounts as at year end were:

	<b>December 2015 US\$</b>	<b>December 2014 US\$</b>
Securities sold receivable	246,229	500,000
Securities purchased in advance	250,000	-
Other receivables	-	2,372
<b>Carrying amount representing credit risk exposure</b>	<b>496,229</b>	<b>502,372</b>

Credit risk arising on transactions with brokers relates to transactions awaiting settlement and cash collateral provided against open contracts. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. The Company monitors the credit rating and financial positions of the brokers used to further mitigate the risk.

**10. Financial Instruments and Risk Exposure (continued)****Credit Risk and other price risk (continued)**

Substantially all of the assets of the Company, including cash, are held by the Custodian. Bankruptcy or insolvency of the Custodian may cause the Company's rights with respect to securities held by the Custodian to be delayed or limited. The Company monitors its risk by monitoring the credit quality of the Custodian used by the Company. The Custodian is a wholly owned subsidiary of Northern Trust Corporation. As at 31 December 2015, Northern Trust Corporation had a Long Term Rating from Standard and Poor's of A+.

Depending on the requirements of the jurisdictions in which the investments of the Company are issued, the custodian may generally, without affecting its potential liability, use the services of one or more sub-custodians.

The Board of Directors analyses and controls credit concentration based on the counterparty, industry and geographical location of the financial assets that the Company holds.

There are 2 individual investments which each exceed 10% of the net assets attributable to the holders of Participating Shares as at 31 December 2015 (31 December 2014: 3)

**Liquidity Risk**

Liquidity risk is the risk that difficulties may be encountered in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. At various times, the markets for some securities purchased or sold by the Company may be illiquid, making purchases or sales of securities at desired prices or in desired quantities difficult or impossible.

As there is not always a recognisable market for the investments made by the Company, it may be difficult to deal in any such investments at the value recorded in the Statement of Financial Position.

The liquidity of the underlying investments of the Company is reviewed monthly based on the marketability of those investments. The diversification of the investment portfolio best reduces overall liquidity risk. No new arrangements have been employed by the Company in managing liquidity risk during the year.

The Company considers that, as at the Statement of Financial Position date, all investments held at fair value through profit or loss would have been realisable within 90 days of that date either through redemption or sale.

Participating Shares in the Company may be redeemed at the Net Asset Value per Participating Share on the dealing day immediately following the valuation day, being the last business day of each month, on at least 90 days notice to the Administrator. The Company endeavours to pay the redemption proceeds within 30 days of the redemption date.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date.

**As at 31 December 2015**

<b>Liabilities</b>	<b>&lt; 1month US\$</b>	<b>1 - 3 months US\$</b>	<b>3 months to 1 Year US\$</b>	<b>Total US\$</b>
Bank overdraft	586,549	-	-	586,549
Investment Adviser fees payable	14,631	-	-	14,631
Administrator fees payable	1,321	-	-	1,321
Custody fees payable	267	-	-	267
Other payables	8,935	-	-	8,935
Net assets attributable to holders of Participating Shares	-	-	8,760,229	8,760,229
<b>Total Liabilities</b>	<b>611,703</b>	<b>-</b>	<b>8,760,229</b>	<b>9,371,932</b>

**10. Financial Instruments and Risk Exposure (continued)**

Liquidity risk (continued)

<b>As at 31 December 2014</b>				
<b>Liabilities</b>	<b>&lt; 1month US\$</b>	<b>1 - 3 months US\$</b>	<b>3 months to 1 Year US\$</b>	<b>Total US\$</b>
Bank overdraft	43,341	-	-	43,341
Investment Adviser fees payable	14,901	-	-	14,901
Administrator fees payable	1,332	-	-	1,332
Custody fees payable	272	-	-	272
Other payables	10,787	-	-	10,787
Net assets attributable to holders of Participating Shares	-	-	8,922,367	8,922,367
<b>Total Liabilities</b>	<b>70,633</b>	<b>-</b>	<b>8,922,367</b>	<b>8,993,000</b>

**Leverage**

The Company may use overall leverage up to a maximum of 30% of the Company's total assets, without double counting, from time to time for general investment purposes or to facilitate redemptions.

During the year the maximum leverage utilised by the Company, measured at any one month end, was less than 7% (2014: less than 9%).

**11. Fair Value Measurement**

The fair value hierarchy prioritises the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurement).

Valuation techniques shall maximise the use of observable inputs and minimise the use of unobservable inputs. The three levels of the fair value hierarchy under IFRS 13 "Fair Value Measurement" are as follows:

- Level 1: Quoted price (unadjusted) in an active market for an identical instrument;
- Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or valuation techniques for which all significant inputs are directly or indirectly observable from market data; and
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Company. The Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The Company categorises Investee Funds into which the Company may invest that provide their own monthly net asset value at level 2 as not independently sourced albeit that the Company does not doubt such net asset value.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Company's perceived risk of that instrument.

### 11. Fair Value Measurement (continued)

Financial instruments whose values are based on quoted market prices in active markets, and are therefore classified within level 1, includes all listed funds with regular independent quotes.

Financial instruments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include certain Forward Foreign Currency Contracts where the price is calculated internally using observable data and Investments in Investee Funds.

As level 2 financial instruments include positions that are not traded in active markets or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity or non-transferability, which are generally based on available market information.

All other unquoted funds would be classified into level 3 category by default. Financial instruments classified within level 3 have significant unobservable inputs, as they trade infrequently or not at all.

The following table presents the financial instruments carried on the Statement of Financial Position by level within the valuation hierarchy as at 31 December 2015.

Financial assets at fair value through profit or loss at 31 December 2015				
	Level 1 US\$	Level 2 US\$	Level 3 US\$	Total US\$
Investee Funds	-	8,875,713	-	8,875,713
Financial assets at fair value through profit or loss at 31 December 2015	-	8,875,713	-	8,875,713
Financial assets at fair value through profit or loss at 31 December 2014				
	Level 1 US\$	Level 2 US\$	Level 3 US\$	Total US\$
Investee Funds	-	8,490,638	-	8,490,638
Financial assets at fair value through profit or loss at 31 December 2014	-	8,490,638	-	8,490,638

There have been no transfers between levels 1, 2 or 3 assets held in either year.

Details of the Company's Investment Portfolio's maturity profile are disclosed in the Liquidity Risk note on pages 17-18.

No investments have been classified as Level 3 at any time during the year, consequently no reconciliation of Level 3 fair value measurements is required.

For the year ended 31 December 2015, and 31 December 2014, all other assets and liabilities, other than investments at fair value, whose carrying amounts approximate fair value would have been considered to be classified within Level 2 if such classification was required.

### 12. Taxation

The Company has received an undertaking from the Ministry of Finance of Bermuda, under the Exempted Undertakings Tax Protection Act, 1966 exempting the Company from Bermuda income, profit, capital transfer or capital taxes, should such taxes be enacted, until 31 March 2035.

### 13. Subsequent Events

No events have occurred in respect of the Company subsequent to 31 December 2015 which would require revision or disclosure in these financial statements.
